- **Arsenal Website Recreation** | A reimagination of the Arsenal website aiming to replicate and enhance its responsiveness, aesthetic value and API-use through the MERN stack | October 2025 - Present

### WORK EXPERIENCE

**FRONT END WEB DEVELOPMENT INTERN** Waste Creative | London | March 2023 – September 2023

- Collaborated with a senior front-end developer to build and enhance responsive, user-friendly web interfaces.
- Integrated RESTful APIs to fetch and display dynamic data, managing asynchronous operations and state updates in React
- Developed dynamic components and single-page applications using React.js and React Router for efficient client-side navigation.
- Implemented modern UI designs with Tailwind CSS, ensuring consistency, accessibility, and responsive layouts.
- Integrated smooth, high-performance animations and transitions using GSAP..
- Utilized Git for version control and collaboration, managing feature branches and resolving merge conflicts in a shared repository.
- Applied HTML5 best practices to create semantic and maintainable codebases.
- Participated in code reviews and debugging sessions to improve code quality and team workflow.

**IT SUPPORT ENGINEER** SmartSystemsIT | London | July 2024 - Present

- Carried out multifarious network installations for clients.
- Solely administered a whole host of our cloud solutions; Microsoft 365 Copilot, Adobe Cloud, Google Workspace, Device Management Software (JAMF), Safeguarding Firewall (Smoothwall), Cloud Printing (uniFLOW), Network Management (UniFi) and Information Management System (iSAMS).

- Gained proficiency in troubleshooting hardware and software issues across ChromeOS macOS and Windows devices, problem-solving, and operating with efficiency both independently and collaboratively.
- Worked at a Secondary School as the head of the IT department, administered their Google Workspace and Active Directory, resolved network issues, firewall management, hardware installations, and any tech-related troubleshooting.
- Liaised and troubleshooted with cloud service providers and demonstrated an ability to understand new systems
- Provided daily technical support for over 300+ students and staff across Windows, macOS and ChromeOS devices

### **ADDITIONAL EXPERIENCE**

Various roles working in customer/public facing roles during my studies
